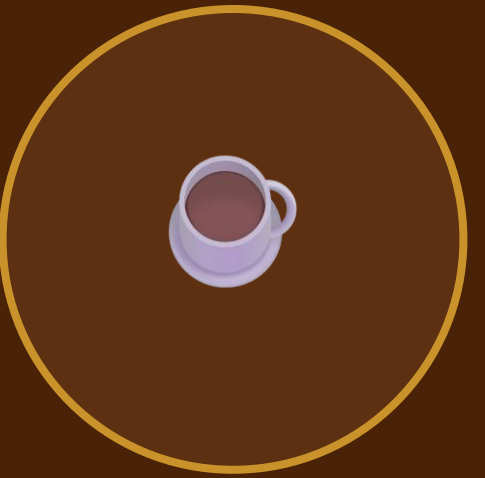
BRIGHT COFFEE shop

Performance Analysis



01 BRIGHT COFFEE SHOP : Revenue Overview

Total Revenue

R 698,812

The store is profitable as it is able to generate such amounts of revenue over 6 months, however it can still be improved

Top product detail

Dark Chocolate (Drinking Choc category)

Dark Chocolate (Drinking Choc category) is the most consistent high-revenue category with several strong individual products while Branded merchandise is clearly a drag on overall revenue

Busiest time of the week

weekdays

Revenue is heavily concentrated on weekdays, indicating strong routine-driven demand and underperformance on weekends. This suggests a clear opportunity to boost weekend sales through targeted strategies

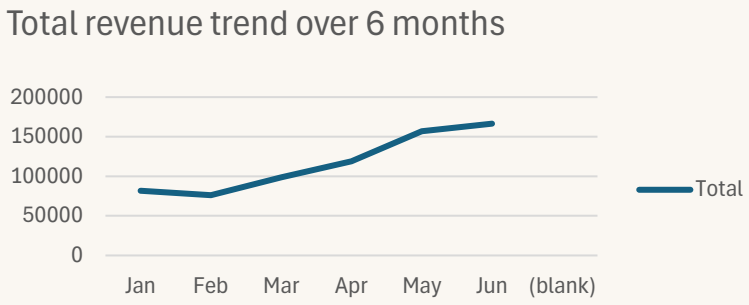
High revenue generating day:

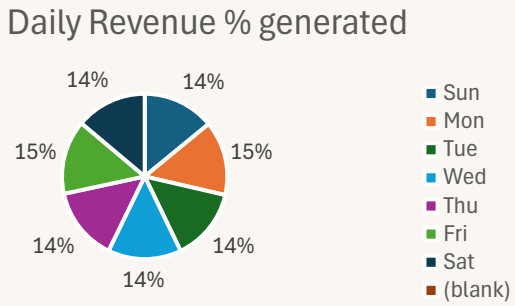
Monday

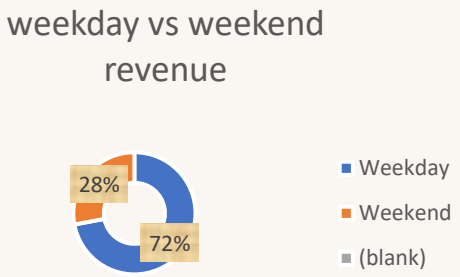
Revenue is evenly distributed across the week, with only slight peaks on certain days like Monday. This reflects stable demand but also highlights limited optimization of high-performing days.

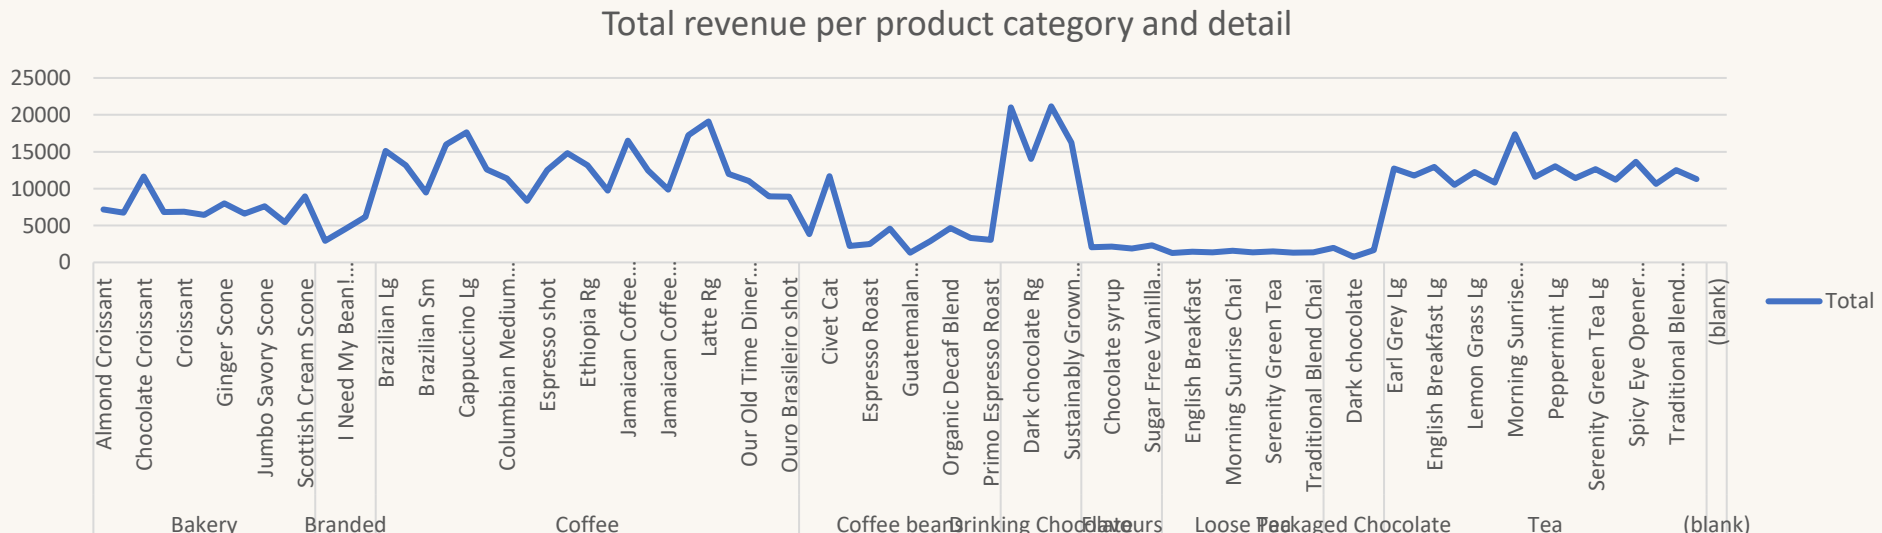
Please proceed to the next slide for a detail analytics view of the above findings.

01 BRIGHT COFFEE SHOP : Revenue Overview









02 BRIGHT COFFEE SHOP : SALES OVERVIEW

Total sales

149,116

A total of 149 116 sales were recorded, which is a reflection of good overall store performance within bright coffee shop.

High sale store location

Hell's Kitchen

Although sales are high, not all stores are contributing the same number of sales, which makes Hell's kitchen the most sale contributing store.

Busiest time bucket

Breakfast rush

Most sales were recorded during the morning breakfast rush

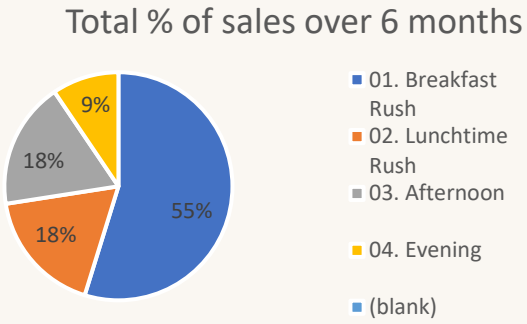
High sale generating month :

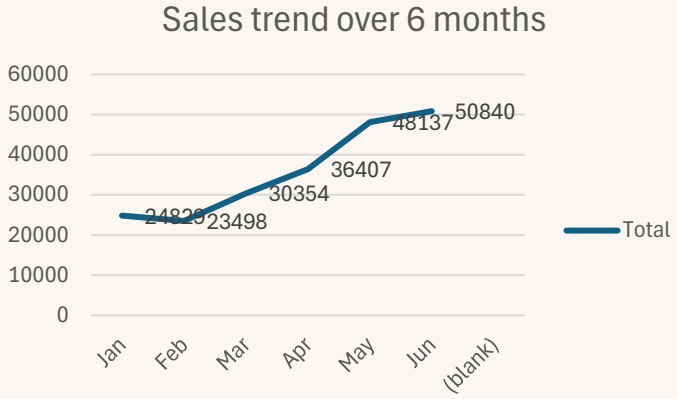
June

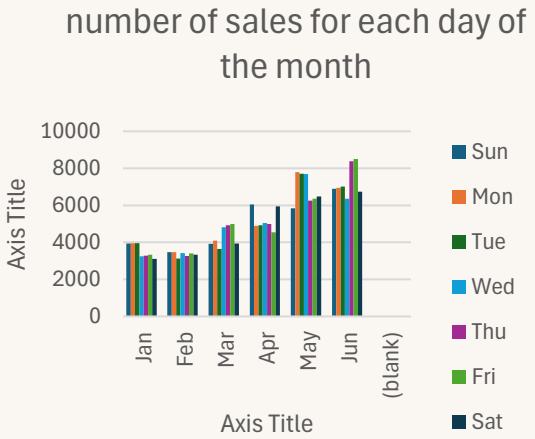
The June winter weather influenced the spike in sales as more people need warm drinks.

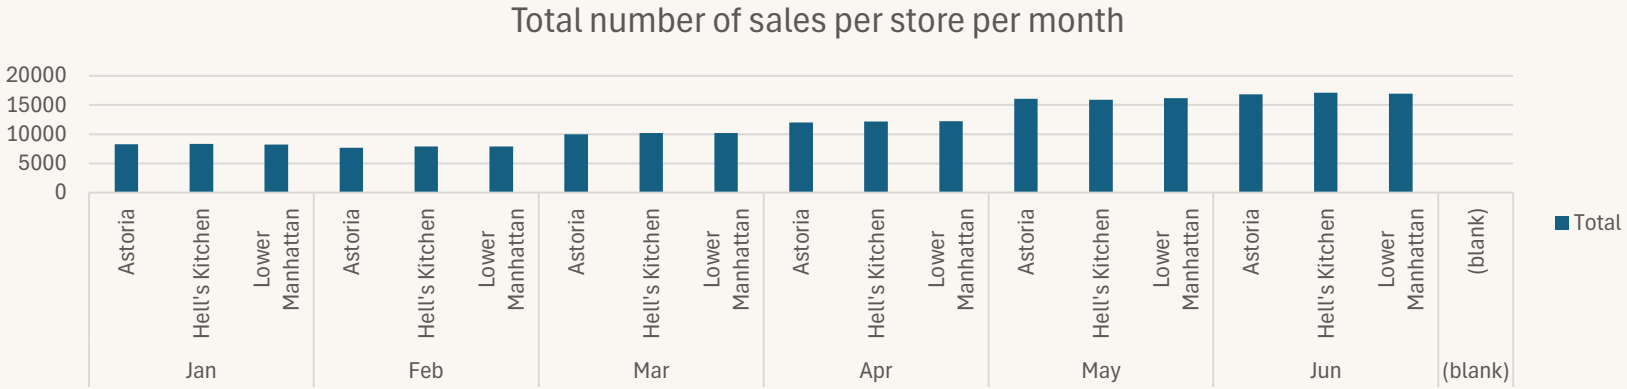
Please proceed to the next slide for a detail analytics view of the above findings.

02 BRIGHT COFFEE SHOP : SALES OVERVIEW









03 BRIGHT COFFEE SHOP : PRODUCT AND CUSTOMER RELATIONSHIP OVERVIEW

Best selling product category

Coffee

Most of our customers love coffee however products such as loose tea, branded and packaged chocolate have low sales, which calls for their promotion or pairing with other products to boost their sales

Average customer spend bucket

Minimun spender

Most customers are minimum spenders, meaning that they spend less than R50 for each sale

Peak time intervals

Breakfast rush

More customers PEAK 8am -12pm which results in high revenue. Less customer traffic is experienced 14h-16h.

Please proceed to the next slide for a detail analytics view of the above findings.

04 | Recommendations

Marketing During Slow Slots

- Launch 2pm–4pm flash promotions
- Push SMS/app alerts at 1:30pm to drive afternoon traffic
- Partner with nearby offices for delivery bundles

Stock More Best-Sellers

- Increase inventory for Espresso, Latte & Brewed Coffee
- Ensure peak-hour (8–12 am) stock is pre-loaded daily
- Implement low-stock alerts for top 5 revenue drivers

Promote Underperformers

- Bundle low performers with bestsellers (e.g. Drip + Muffin)
- Feature one low-seller weekly as a Staff Pick
- Test markdown pricing to gauge price sensitivity

Thank You
